

admin으로 로그인을 하라고 한다.

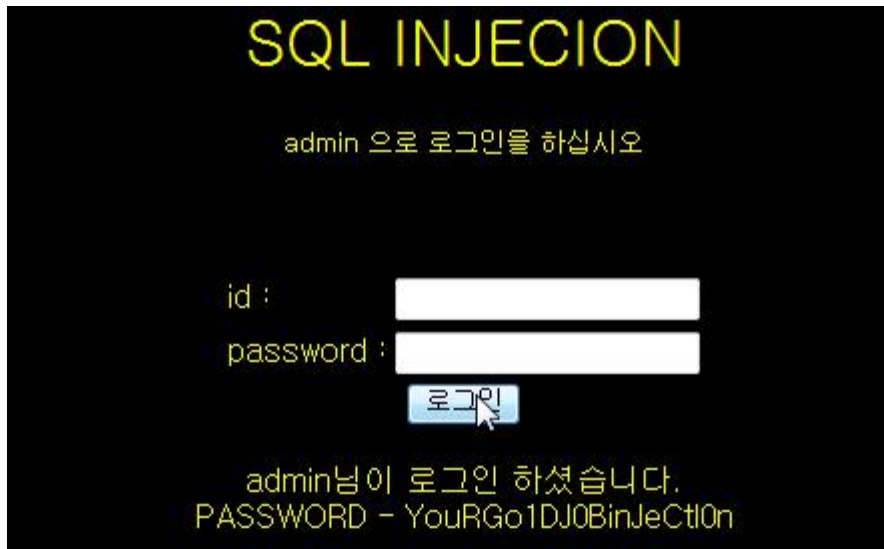

The screenshot shows a web application interface with a black background and yellow text. At the top, the title "SQL INJECTION" is displayed in a large, bold font. Below the title, the instruction "admin 으로 로그인을 하십시오" (Please log in as admin) is shown. The login form consists of two input fields: "id :" and "password :". The "id :" field contains the text "I". Below the input fields is a blue button with the text "로그인" (Login). At the bottom of the form, the word "false" is displayed.

대충 인젝션을 해보자.

This screenshot shows the same web application interface as the previous one, but with an SQL injection attempt. The "id :" input field now contains the payload "admin' and 1=1#". The "password :" field is empty. The "로그인" (Login) button is still present, and the word "false" is displayed at the bottom of the form.
